You can find names of components at location: `"/components/*"` . Modify content of the configuration file. In the file itself you will find instructions. Do not forget to delete, if exists, relevant cache file located at `"/plugins/content/mailorder/config/cache/*.dat"` .

Mailorder is not working?

Turn off Joomla cache from “Site >> Global Configuration >> Cache”.

Check the backend "Extensions >> Plugin Manager" whether "**Content - Mailorder**" and "**System - Plugin Invoker**" are installed and activated. If they are not activated, activate them. Check if it works.

Check that you have appropriate configuration file for target component in ["/plugins/content/mailorder/config/"](#). If not, create one (see: How to activate mailorder for custom content component?). Check if it works.

Check that you have appropriate configuration file for target component in ["/plugins/system/plginvoker/config/"](#). If not, create one. Check if it works.

If still mailorder won't start, check content of configuration files located at: ["/plugins/system/plginvoker/config/"](#) and ["/plugins/content/mailorder/config/"](#). In the files itself you will find instructions how to use them.

Turn on Joomla cache from “Site >> Global Configuration >> Cache”.
